FOR IMMEDIATE RELEASE

Caris Life Sciences to Present at the 38th Annual J.P. Morgan Healthcare Conference

IRVING, Texas, Jan. 2, 2020 – Caris Life Sciences®, a leading innovator in molecular science focused on fulfilling the promise of precision medicine, announced today that the company will present at the 38th Annual J.P. Morgan Healthcare Conference on Tuesday, January 14, 2020, at 11:00 a.m. Pacific Time at the Westin St. Francis Hotel, Elizabethan C room, in San Francisco. The company will provide an overview of the business and discuss recent corporate achievements that position it to further extend its leadership in the market. Caris Life Sciences will be represented by David D. Halbert, Chairman, Chief Executive Officer and Founder, Brian J. Brille, Vice Chairman, and David Spetzler, MS, MBA, Ph.D., President and Chief Scientific Officer, and they will take questions from the audience following the presentation.

About Caris Life Sciences
Caris Life Sciences® is a leading innovator in molecular science focused on fulfilling the promise of precision medicine through quality and innovation. The company’s suite of market-leading molecular profiling offerings assesses DNA, RNA and proteins to reveal a molecular blueprint that helps physicians and cancer patients make more precise and personalized treatment decisions.

Caris is also advancing precision medicine with Next Generation Profiling™ that combines its innovative service offerings, Caris Molecular Intelligence® and ADAPT Biotargeting System™, with its proprietary artificial intelligence analytics engine, DEAN™, to analyze the whole exome, whole transcriptome and complete cancer proteome. This information, coupled with mature clinical outcomes on thousands of patients, provides unmatched molecular solutions for patients, physicians, payers and biopharmaceutical organizations.

Whole transcriptome sequencing with MI Transcriptome provides the most comprehensive and unique RNA analysis available on the market and covers all 22,000 genes, with an average of 60 million reads per patient, to deliver extremely broad coverage and high resolution into the dynamic nature of the transcriptome. Assessing the whole transcriptome allows us to dig deeper into the RNA universe to uncover and detect fusions, splice variants, and expression changes that provide oncologists with more insight and actionable information when determining treatment plans for patients.
Caris Pharmatech, a pioneer of the original Just-In-Time research system with the largest research-ready oncology network, is changing the paradigm from the traditional physician outreach model to a real-time approach where patient identification is completed at the lab and the physician is informed so that the patient can be enrolled days earlier, and remain in the local physician’s care, without having to travel to a large central trial site. This fundamentally redefines how pharmaceutical and biotechnology companies identify and rapidly enroll patients in precision oncology trials by combining Caris’ highest quality industry leading large-scale molecular profiling services with Pharmatech’s on-demand site activation and patient enrollment system.

Headquartered in Irving, Texas, Caris Life Sciences offers services throughout the U.S., Europe, Asia and other international markets. To learn more, please visit www.CarisLifeSciences.com or follow us on Twitter (@CarisLS).
